# LoeschPack showcases highly customizable packaging machines

**(Altendorf/Cologne, 11/25/2026) When the confectionery and snack industry gathers at ISM Manufacturing in Cologne from January 31 to February 3, 2027, LoeschPack and Hastamat will both be exhibiting. Together, the two packaging specialists will present high-performance systems that can be scaled and configured to meet individual customer requirements. The two subsidiaries of the Piepenbrock Group will exhibit their packaging solutions for confectionery and snacks at booth C050 D059 in Hall 4.1.**

Formerly known as ProSweets Cologne, ISM Manufacturing is the international trade fair for suppliers to the confectionery and snack industry. Each year, it brings together manufacturers, distributors, and buyers from around the world. “We develop highly specialized packaging solutions for companies around the world, precisely tailored to their products, processes, and production environments. Together with Hastamat, we are continuously expanding our value chain,” says Olaf Piepenbrock, Managing Partner of LoeschPack, Hastamat, and the Piepenbrock Group. “Our slogan ‘Packaging your ideas…’ is a promise to our customers that we’ll turn their ideas into reality, whether they need a single machine or a complete packaging line.”

## Cartoning tailored to customer requirements

At its booth at ISM Manufacturing, LoeschPack will demonstrate its high-performance CMT cartoner to trade visitors. The flexible top-loading cartoning system in the C series erects and fills open or closed folding cartons and closes the lidded versions. Depending on the format, infeed configuration, and type of display carton, the CMT can operate at medium to very high speeds. The cartoner can handle up to 1,000 confectionery, food, or non-food items per minute at the infeed, with an output of up to 200 cartons per minute in a range of configurations. “What our customers particularly appreciate about the CMT is its compact design. That allows it to fit seamlessly into existing packaging lines,” explains Olaf Piepenbrock. “Its highly modular design makes it an ideal end-of-line addition to almost any packaging system.”

## System solutions that keep pace with industry needs

In developing its wide range of packaging solutions, LoeschPack considers both the challenges facing the industry and the practical needs of manufacturers. “That applies whether we’re developing solutions for new industries and technologies, adapting solutions from established industries, or transferring technology: We want our machines to become more customizable, efficient, and cost-effective, but our priorities go beyond that. Hygiene and cleaning, packaging regulations, alternative packaging materials, and reducing compressed air use are also high on our agenda,” says Olaf Piepenbrock.

## About Loesch Verpackungstechnik

LoeschPack is a technology and innovation leader in packaging machines and complete systems for packaging chocolate, chewing gum, confectionery, and dry baked goods, as well as other food and non-food products. Since 1919, the company has embodied the highest quality standards, providing flexible, cost-effective system solutions and comprehensive application expertise for demanding markets. The guiding principle of “Packaging your ideas…” encapsulates Loesch’s ambition: to focus not merely on machines but also on each customer’s unique needs and ideas, transforming them into tailor-made, future-proof packaging solutions. A globally available service organization with innovative solutions complements the company’s portfolio.
