

LRM-DUO

Twin Station Fold Wrapping Machine

Automatic twin station high performance fold wrapping machine for chocolate multipacks

Target applications are smaller multipacks for small chocolate products such as Napolitains or bars. The pre-grouped products are first packed in diverse cardboard box multipacks and then wrapped in tightly sealed cellophane. The LRM-DUO is the flexible, twin station fold wrapping machine at high speeds of up to 230 multipacks per minute.

Customer Benefit:

- > Modular, twin station fold wrapping machine, designed for the specific requirements of carton multipacking of chocolate
- > Matching feeding modules, optionally with grouping, stacking, and supplementary stations, designed for upstream main packing Machines
- > Robust machine construction in front plate design
- > Large touch panel for full visualisation of all functions and machine states
- > High speeds of up to 230 cellophaned carton multipacks a minute with high efficiency
- > Direct combination with Loesch main packing machines for chocolate products. Combination with semi or fully-automated product feeding systems
- > Excellent product protection with optional hermetically sealed packaging
- > High flexibility for diverse pack formations with simple format changeover
- > High hygienic and ergonomic standard. Easy access for cleaning and maintenance
- > High availability and machine safety
- > Stands out with innovative multipacks
