## Fold Wrapping Machine

### Automatic fold wrapping machine for chocolate bars and tablets

The excellent compact fold wrapping machine for a performance range of up to 600 wraps per minute. The machine is mainly used in the confectionery industry and wraps enrobed and formed chocolate bars and tablets, small tablets or napolitains, wafers and other similar products in one or two wrappings. Preferably in combination with LoeschPack LTM-K-SA for multipacks.

### Customer Benefit:

- > Well-established, highly modern machine concept specially for chocolate products
- > Special cam gear running in an oil bath
- > Computer-optimized special hardened cams
- > Easy access to all sections
- > Servo drives for product and wrapping material infeed
- > Large touch panel for full visualization of all functions and machine states
- > Modular built, robust machine construction in front plate design
- > Excellent wrapping quality
- > Wrapping in one or two packaging materials, also glued/sealed
- > Different types of fold wraps
- > Very fast, easy change-over
- > Very high speed and wide size range
- > High hygiene standard by separation of drive and product areas
