

LRM-S

Single-stage fold wrapping machine

Fast and efficient packaging of small products or bars in a fold wrap

The LRM-S is a compact fold wrapping machine for the upper performance range of up to 600 packs a minute. The machine wraps enrobed and formed large, medium, and small chocolate bars and Napolitains, wafers, and other similar products in one or two wrapping materials. The LRM-S platform enables several variants for a variety of applications: With the LRM-HS sealing version, up to 450 products a minute can be hermetically sealed. The two-lane LRM-2-S can handle up to 1,100 products for uncompromising performance in the creation of upscale fold wrappers for chocolate Napolitains.

Efficiency, flexibility and performance

- > Different types of fold wraps
- > Very high speed and wide size range
- > Little cleaning and maintenance effort
- > Wrapping in one or two packaging materials, also glued or sealed
- > Servo drives for product and wrapping material infeed
- > Gentle product transport by continuous conveyor belts and separation
- > Fast and reproducible format changeover
- > Packaging material flexibility for paper and plastics
- > Qualitatively appealing packaging in the high-performance range
- > Hygienic and space-saving design
- > Optimized accessibility for operation, maintenance and cleaning
