

RPM-S

Roll wrapping machine

Automatic high speed roll wrapping machine

Completely new, modular, and ultramodern roll packing system with particularly product-friendly loading mechanisms and the RPM-S core machine. Unique in the world the platform provides hermetically sealed roll wrapping at the highest speeds for round chocolate products (up to 300 rolls/min.) and tablet-shaped products (up to 350 rolls/min.)

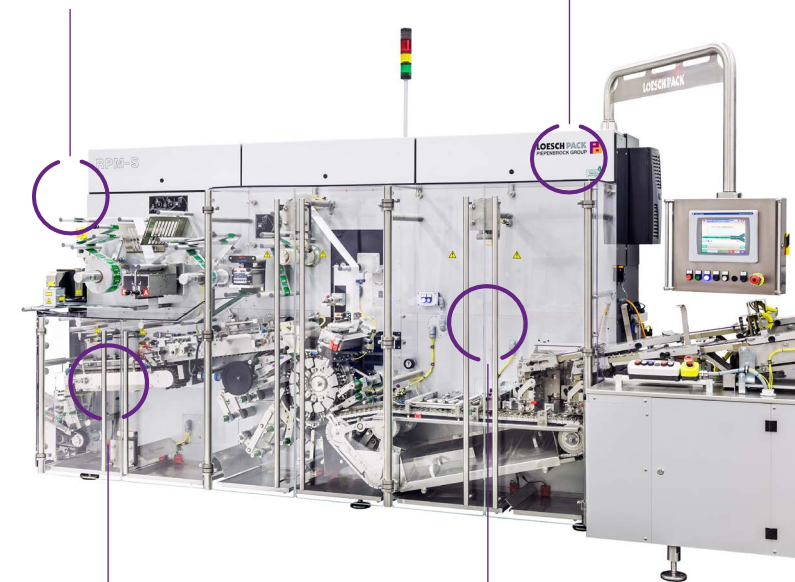

Performance and efficiency

- > Extremely short format changeover times of under one hour within one size range. All settings can be fully reproduced, ensuring rapid stable operation, start-up issues minimized
- > Optional autosplice guarantees maximum availability
- > Highest hygiene standards: easy and time-saving cleaning at long intervals
- > The highest standards for superior reliability: stable, sophisticated and premium-quality design
- > Long service intervals
- > Gentle product handling by consequent reduction of touching points and sealing operations only foil against foil
- > Easy machine adjustments to different packaging materials by servo driven packaging material infeed, folding and sealing elements
- > Space-saving and compact modular design

Extremely gentle product handling

Tightly sealed roll packs

Maximum format and pack style flexibility

Highest performance range
