

# FHW-S

## Performance HFFS

### Fast and efficient packaging of products in a flow pack

The FHW-S horizontal flow wrapping system, which has been systematically designed for high speed and efficiency, is equally suitable for cold seal and heat seal applications. With its product-specific high-performance infeed, the machine packs up to 2,100 products at up to 205 film meters a minute. Both traditional and alternative packaging materials can be easily used on the platform – and at the touch of a button with minimal changeover effort. The re-design features high overall line efficiency and performance as well as maximum format and packaging flexibility. Thanks to a wide range of upstream and downstream equipment from LoeschPack, this is an optimal system component in a line combination for bar packaging.

Up to 2,100 products per minute are possible for chocolate napolitains. Top performance in this segment!

### Efficiency, flexibility and performance

- > Quick and easy format changeover
- > Little cleaning and maintenance effort
- > Product flexibility in the food and non-food sectors
- > Fast and reproducible format changeover
- > Packaging material flexibility for paper and plastics
- > High format flexibility
- > Qualitatively appealing packaging in the high-performance range
- > High film speeds for cold and heat seal films
- > Hygienic and space-saving design
- > Optimized accessibility for operation, maintenance and cleaning
- > Professional advice on packaging style and film structure
- > High efficiency due to autosplice as standard
