

CMT

Top loading cartoning system

LoeschPack C-Series cartoning system for folding boxes

The CMT is a particularly flexible and powerful system for setting upright, filling and closing open or closed folding boxes in the maximum speed range. In product feeding, up to 1,000 products a minute are achieved – with a maximum speed of up to 200 cartons a minute. The system is used for applications that require high flexibility and precision in pre-grouping products in display folding boxes, primarily in the confectionery and food industries. Cartons are set upright from flat blanks and filled with various accumulable and non-accumulable products in the desired pack formation. Thanks to its highly modular design, the CMT can handle a wide range of different layouts.

Performance & Effizienz

- > High OEE (Overall Equipment Effectiveness)
- > Quick and easy format changeover
- > Vertical startup
- > Fully reproducible settings
- > High reliability, efficiency and availability of the packaging line
- > Very small footprint for high-performance applications
- > High flexibility in packaging design
- > Smart infeed high performance feeder
- > Largely tool-free format and belt changes
- > Outstanding maintenance and cleaning accessibility to all working areas
- > Low-maintenance overall design, thus long cleaning and service intervals
- > easyMI Touch Screen for all important information and input
- > Ideally harmonized packaging systems – from the feeding to the display carton
